Port Cameron Signs Teaming Partnership with Peterson

Lake Charles, LA – Port Cameron, LLC and Peterson have signed a teaming partnership agreement where Peterson will act as Port Cameron’s logistics consultant to support the planning, development and marketing of the initial development of Port Cameron.

Peterson is a leading international integrated energy logistics provider with a strong track record in optimizing integrated supply base and logistics operations.

Under the arrangement Peterson will have the option to lease up to 1,200,000 square feet of space in Port Cameron Logistic Center and will also serve as Port Manager. As Port Manager, Peterson will provide operational support in relation to facility and port management, including assisting Port Cameron with marketing and strategic development.

“We are very excited about this new partnership and we believe it will be mutually beneficial to both parties as Peterson’s knowledge of port logistics services, energy solutions, transportation and logistics will lend itself to Port Cameron establishing itself as a premiere shore based intermodal port,” said Bud Viator, Chairman of Port Cameron Executive Committee.

“Port Cameron presents energy operators and service companies in the Gulf with a tremendous opportunity to position their business in a premier deepwater oil and gas port centrally located to conveniently serve offshore installations in the region,” explains Ted Falgout, Executive Director for Port Cameron.

“We look forward to supporting Port Cameron with the development of a state of the art port to serve the industry in the Gulf region. Being involved from startup gives us the opportunity to share our learning and experience gained over many years of managing port and supply base operations in major strategic energy locations around the world.

As well as international best practice, we bring a solid understanding of processes and systems to optimize port and supply base operations; essential at a time when the

industry is looking to improve efficiency and reduce costs,” said Erwin Kooij, CEO, Peterson Offshore Group.

Upon completion, Port Cameron will be the largest private energy services facility on the Gulf Coast with more than 21,000 linear feet of bulkhead lots on dredged slips of 500-feet and 700-feet wide and dredged depths of 33 feet.

About Port Cameron:

Port Cameron is a private, land based, deep water energy support complex, comprised of 500-acres , and 750 more acres available for future expansion, to be built on the Calcasieu Ship Channel, only three miles from the Gulf of Mexico, 19 miles from the Intracoastal Canal, less than 50 miles from Interstate 10, and within 185 miles of Houston. The new state-of-the-art port complex will provide the Gulf energy industry with logistical advantages that will save time and money while helping to reduce business interruption risks.
